**I-MASK+ PREVENTION & EARLY OUTPATIENT TREATMENT PROTOCOL FOR COVID-19**

**PREVENTION PROTOCOL**

<table>
<thead>
<tr>
<th>Medicine</th>
<th>Description</th>
</tr>
</thead>
</table>
| Ivermectin*      | Chronic Prevention - 0.2 mg/kg per dose (take with or after a meal) - twice a week for as long as disease risk is elevated in your community.  
Post COVID-19 Exposure Prevention - 0.6 mg/kg per dose (take with or after a meal) - one dose today, repeat every 48 hours. |
| Vitamin D3       | 1,000-3,000 IU/day                                                          |
| Vitamin C        | 500-1,000 mg twice a day                                                    |
| Quercetin        | 250 mg/day                                                                  |
| Zinc             | 30-40 mg/day (elemental zinc)                                               |
| Melatonin        | 6 mg before bedtime (causus drowsiness)                                    |
| Gargle mouthwash | 2 x daily – gargle (do not swallow) antiseptic mouthwash with cetopyridinium chloride (e.g. Scope™, Act™, Crest™), Listerine™ with essential oils, or povodone/iode 1% solution as alternative. |

**EARLY OUTPATIENT PROTOCOL**

<table>
<thead>
<tr>
<th>Medicine</th>
<th>Description</th>
</tr>
</thead>
</table>
| Ivermectin*      | 0.4-0.6 mg/kg per dose (take with or after a meal) - one dose daily, take for 5 days or until recovered.  
Use upper dose range if: 1) in regions with aggressive variants (e.g. “Delta” variant);  
2) treatment started or after day 5 of symptoms or in pulmonary phase; or  
3) multiple comorbidities/risk factors. |
| Fluvoxamine*      | 50mg twice daily for 10-14 days                                              |
| Nasal/oral rinse  | 3 x daily – gargle (do not swallow) antiseptic mouthwash with cetopyridinium chloride (e.g. Scope™, Act™, Crest™), Listerine™ with essential oils, or povodone/iode 1% solution as alternative. Nasal rinse instructions below. |
| Vitamin D3       | 4,000 IU/day                                                                |
| Vitamin C        | 500-1,000 mg twice a day                                                    |
| Quercetin        | 250 mg twice a day                                                          |
| Zinc             | 100 mg/day (elemental zinc)                                                 |
| Melatonin        | 10 mg before bedtime (causus drowsiness)                                   |
| Aspirin          | 325 mg/day (unless contraindicated)                                        |
| Pulse Oximeter   | Monitoring of oxygen saturation is recommended (for instructions see page 2) |

---

1. The dosing may be updated as further scientific studies emerge. The safety of ivermectin in pregnancy has not been definitively established. Use the 1st trimester should be discussed with your doctor.
2. To use if a household member is COVID-19 positive, or you have prolonged exposure to a COVID-19 positive patient without wearing a mask.
3. For late phase – hospitalized patients — see the FLCCC’s MATH+ Hospital Treatment Protocol for COVID-19 on www.flccc.net.
4. Some individuals who are prescribed fluvoxamine experience acute anxiety which needs to be carefully monitored for and treated by the prescribing clinician to prevent rare escalation to suicidal or violent behavior.
5. Nasal rinse – 3 x daily. Use 10% povodone/iode wound wash. Take 1 ml (1/4 tsp) mix with 9 ml saline solution [2 tsp]. Use nasal irrigation bottle or syringe.

Please regard our disclaimer and further information on page 2 of this document.
